- Can backup then restore database to any Windows XP computer.
- Create "ready to go" backup system with any computer.
- Network capable for multiple programming stations.
- Operates simultaneously with other software.
- Visually intuitive for first time users.
- Full control of operator privileges.
- Track all card creation.
- Connect to front desk system from home to view activity. Use Windows XP Remote Desktop Protocol.

"Insert to Enter"

- Card contains Room Number, Expiration Day and Expiration Time.
- Card does not have guest sensitive information (no credit card information).
- Issue multiple cards per room with different expirations.
- Easily extend the stay.
- Temporarily remove guest access from the room anytime with an Administrator Card.

INSERT TO
ENTER

"Insert to Program"

- Eliminates the old style of programming the lock with a hand held programmer.
- Insert the Programming Card into the lock…The lock is now programmed!
- Insert the Time Card into the lock…The lock's time is now updated!
- Insert the Data Clear Card into the lock…The lock memory is now erased!
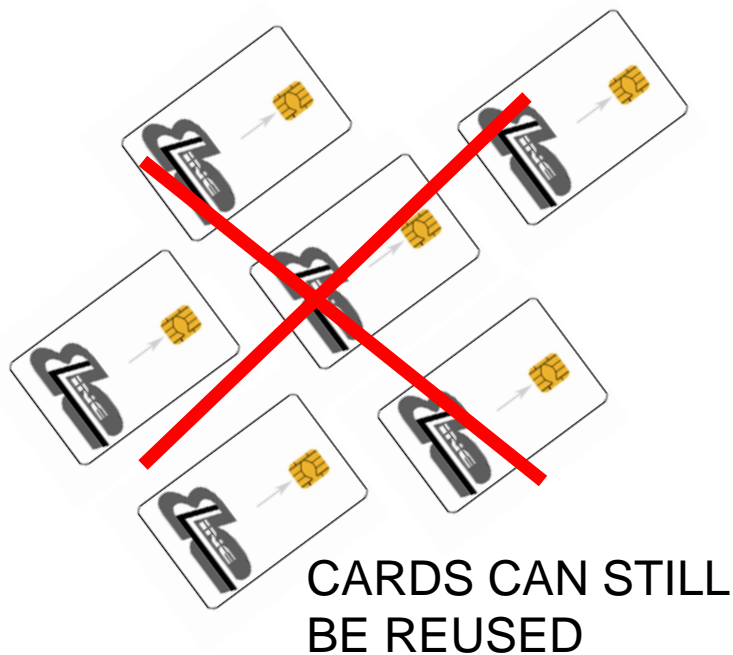

INSERT TO PROGRAM

Card Cancelation

- A newly issued card will kill the old card therefore the older card can no longer be used on the room door.
- An Administrator Card can delete the card from a lock.
- Or…an Administrator Card can temporarily remove guest access from the room.

NEW CARD KILLS OLDER CARDS

CARDS CAN STILL BE REUSED

Foreman Cards

- Building Card – Will open any door in the assigned building. Will not open a door with deadbolt engaged.

- Floor Card – Will open any door in the assigned floor and building number. Will not open a door with deadbolt engaged.

- Emergency Card – Will open any door and keep it permanently unlocked. Will even open a door with a deadbolt engaged.

- Master Card - Will open any door and open a door with a deadbolt engaged.

Tracking Activity

- Inserting a Data Card into the lock will start the download of the last 255 entries from the lock.
- Entry by all card types and metal key will be listed with the date and times of entry.
- Entry listed will be saved to the database on computer.
- Entry list can be emailed or printed.
